## **PREMIER SCREEN:** A NEW GENERATION OF FIBERGLASS SCREENING FOR YOUR POOL AND PATIO!

JM Fastener World's **PREMIER SCREEN** represents the latest in technical advancements in the design and manufacture of fiberglass insect screen. Our screen was designed to give your pool enclosure maximum transparency, clarity, and with minimal glare or distortion.

How did we do it?

First, in order to employ the latest in technical advancements, we started off by developing a specially made fiberglass yarn that was particularly high in strength and quality.

Second, unlike all other legacy fiberglass screening which coats its screen fabric utilizing an old and low-tech dip coating process, **PREMIER SCREEN** coats its fiberglass by utilizing the latest in CO-EXTRUSION technology. Specifically, rather than dipping our yarn in PVC liquid and baking it in old ovens like the others, our PVC coating - via sophisticated machinery - is CO-EXTRUDED, a process where a protective PVC shell is formed (extruded) instantaneously around the raw yarn.

How does this benefit you the pool enclosure owner?

\* Extruded coating yields a much smoother and more uniform surface coating. This has the benefit of giving the screen fabric greater transparency and "invisibility". It also, reduces the "shininess" or reflectivity of the screen fabric. So whether you are looking through your screen from the inside or the outside, our screen is much less noticeable than the others. The BEST screen is the one that is the LEAST noticed!

\* The co-extruding coating process of our fiberglass yarn yields a finished product that is almost exactly as you would find on PVC colored electrical wire. The resulting PVC shell forms a much more durable coating than dip coated yarn, and will not pit and flake off as will occasionally occur with legacy, old-technology fiberglass screen. This all means that Premier Fiberglass Screen will maintain its luster and stay looking newer, LONGER!

\* **PREMIER SCREEN's** durability allows us to offer a 3-year limited warranty on all of our fiberglass screening products.

Please join the thousands of other satisfied homeowners and make sure to request **PREMIER SCREEN** for your screen room or pool enclosure!

**Fiberglass Available Sizes:**

36", 48", 54", 60", 66", 72", 78", 84", 90", 96", 102", 108", 120" & 132"

3-year limited warranty!

**Fiberglass Available Sizes:**

72", 84", 96", 108", 120" & 132"

3-year limited warranty!

**Polyester Available Sizes:**

72", 84", 96", 108", 120", 132", 144" & 160"

10-year limited warranty!

**Polyester Available Sizes:**

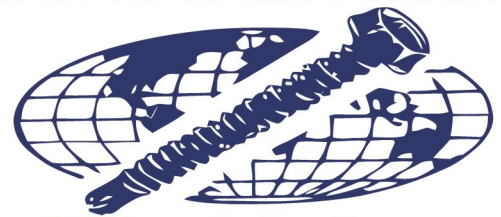

72", 84", 96", 108", 120", 132", 144" & 160"

10-year limited warranty!

\* Premier GLASS Screen also avail in 36" & 72"

**EXCLUSIVELY AVAILABLE AT**

**J.M. Fastener**
